

Country:	Czech Republic
Member/Company	VÍTKOVICE STEEL
Initiative	<i>Multiple Initiatives</i>

Overview

VÍTKOVICE STEEL is a leading European manufacturer of rolled steel products and the **largest manufacturer of steel plates** in the Czech Republic. The main production program includes heavy plates and shaped cutouts, which are produced in the sheet metal rolling mill, and sheet piles, which are produced in the heavy beam rolling mill.

The company is the only **manufacturer of sheet piles in the Czech Republic** and one of only two manufacturers in the European Union. The production of heavy plates enjoys a strong market share in the key domestic market. Products undergo **quality control** in our own accredited testing laboratories that have the most advanced testing equipment. <http://www.vitkovicesteel.com/en/>

Activities fit to the project Business for Youth:

There are plenty activities in cooperation with the Universities, High and secondary schools. For our project could be relevant

- Workshops “How to be prepared for the labour market”. How to prepare the C.V, how to be prepared for the interview, how to present her/himself, recommendation (tips, tricks) how to enter on the labour market.
- Helping to acquire working habits during the studying – responsibility, to be a good colleague, H&S, to cooperate
- To facilitate access of the disadvantages young people to the education (financing of the personal assistants)

<http://www.vitkovicesteel.com/en/pages/cooperation-with-secondary-school-and-university-students>

But there are many others: flexible working contract for the studying young people, creating places for internship and, traineeship, benefits etc.
